**TEAMVIPER**  
**EVENT** Logistics

Pulling Power on Demand

Unique in the UK,  
**TEAMVIPER'S**  
comprehensive service  
takes the hassle out of event  
logistics

**TEAMVIPER** specialise in moving stages, toilets, generators, catering units, hospitality units, caravans; in fact anything with a tow hook. We have a fleet of premium, 3500kg capacity Land Rovers and a team of staff fully trained in Land Rover and trailer handling. Our nationwide service is costed by straightforward mileage.

Relax in the knowledge that TeamVIPer have many years of experience in the events industry and can safely, quickly and efficiently deliver units to site and get them up and working instantly. Leave everything in our hands. You won't need to revisit the site.

Let TeamVIPer handle that extra business until you can justify purchasing and manning an additional vehicle.

Many of our customers are expanding small businesses. They use us to smooth out the peaks and troughs in demand without having to pay overtime or exhaust their existing staff. By calling on TeamVIPer, an events company can move twice or even three times as many units per week, without having to splash out on an extra vehicle just yet.

\* 1 vehicle may be able to move 8 units per week but struggles to move 11

\* 2 vehicles can easily move 11 units but don't work efficiently until moving 16

Instead of draining your cash flow on that extra vehicle let us take the strain, giving you greater flexibility and the confidence to explore new markets.

Let TeamVIPer work with your company to smooth out your logistical mountains.

Use us as an emergency backup or rely on us to deliver 100% customer satisfaction to your clients on a regular basis. We'll work in the way that suits you best.
